Am I the only person who has nothing but a white screen on my qlink phone? It's been like this almost 2 weeks now. The map on here shows almost half the country is having qlink issues. Is my phone broke or is the service just out after qlink got raided by the FBI, IRS, Federal Marshall's a few weeks back? I have already done a factory reset, let the phone sit a couple days without the battery, there's not much I can do since I cannot see anything on the screen. When I switched to qlink and bought my phone I was under the impression it would be a new phone but after it stopped working I took the back off and saw it is already 3 years old. Qlink sent me an old phone and I was thinking that's why it stopped working until I stumbled across this site that says the company is down every where. Any one else having the same issue? Is Qlink completely down? Is this why my phone doesn't work anymore? Anyone else buy an old worn out phone thinking you was paying for a new phone?
