QLink service in/out/down in Metro Dayton and surrounding communities. I called them a couple weeks ago after having same intermittent service for at least a month. They said a couple days to wait 48-72 hours and they saw NO outages or issues with their network. Call escalated to higher tech, repeat same APN and network refresh, take out sim and clean it. Have screenshots if anyone wants to verify it. Hmph.

Still in/out/down in Dayton area Ohio. Now I'm getting status indicators flipping from "H" with no tower, 3G, Lte with no towers or empty bars, to emergency service only.
