I've downloaded every version of SearchLink that you've posted and never once got to digging into the documentation. I did this time and I love it (the app, nice docs too). I'm horrible at working new keyboard shortcuts into my memory, but I'm determined to get something going. Oh, I tried the example list you included and noticed a thrown error on Purple Animator. It seems that it has been renamed Purple Motion.

yeah, that actually became my error test. If you turn on error reporting, it will show a nice message with the missed result :)
