> @be_seeing_you @ttscoff Throw stuff in clipboard to get RTF out. Using an apple dev incident to figure out the encoding bug you see in test

Was it that you didn't specify an encoding for textutil? It jumbled up non-ASCII characters unless I added -inputencoding UTF-8:

```
textutil -inputencoding UTF-8 -format html -convert rtf -stdin -stdout <<< "<style>$(cat
/Applications/Marked.app/Contents/Resources/...%3C/style%3E$(multimarkdown
"Marked.app/Contents/Resources/swiss.css)</style>$(multimarkdown") {rel="nofollow" target="_blank"}
<<< '# ää[])' | LC_ALL=UTF-8 pbcopy
```

pbcopy also uses ASCII if LC_CTYPE is C (or unset).
