Well, 1Password is fairly useless without Dropbox (unless you only use 1 device), so either way you have 'web storage'. From what I've read, I'm more inclined to trust LastPass with my data than Dropbox, but either way it *\*is\** a matter of trust.

1Password does have a nice interface, which is why I bought it for Mac and iOS a while back. But it was so much more work to use than LastPass that I have ended up rarely using it.
