When testing the script I am getting some errors:

```
rsslogger.rb:49:in `log_rss': undefined method `pubDate' for #<RSS::Atom::Feed::Entry:0x1042af7b0>
(NoMethodError)
from <path>/lib/rsslogger.rb:48:in `each'
from <path>/lib/rsslogger.rb:48:in `log_rss'
from <path>/lib/rsslogger.rb:41:in `each'
from <path>/lib/rsslogger.rb:41:in `log_rss'
from slogger:52
```

Any idea on what goes wrong?

## **Brett — Aug 06, 2012 03:18 pm**

I'm not sure the RSS module in Ruby understands Atom... I'll check it out , in the meantime does your feed have an RSS/RSS2 alternative?

## **Andrew Eakett — Aug 06, 2012 06:03 pm**

I had the same issues with atom feeds, so I tried the corresponding rss and got a different error:  
<https://gist.github.com/3274644>

## **Brett — Aug 06, 2012 06:22 pm**

It appears that feed doesn't have a content field, I assume it's an excerpt-only feed. Slogger checks the content field for post images, I'll just have it skip that part if it doesn't exist.

## **Jeroen Sangers — Aug 07, 2012 02:54 pm**

I ran the feed through FeedBurner to convert it to RSS2 and it now works fine.
