I'm not sure the RSS module in Ruby understands Atom... I'll check it out , in the meantime does your feed have an RSS/RSS2 alternative?

I had the same issues with atom feeds, so I tried the corresponding rss and got a different error:

It appears that feed doesn't have a content field, I assume it's an excerpt-only feed. Slogger checks the content field for post images, I'll just have it skip that part if it doesn't exist.

I ran the feed through FeedBurner to convert it to RSS2 and it now works fine.
