Yeah, I set it up to look for a content.encoded field without adding an error check. Fixed in the next version, but if you look for the line (in rsslogger.rb):

```
image_match = item.content_encoded.match(/src="(http:.*?\.(jpg|png)(\?.*?))"/i)
```

And change "content_encoded" to "description", should clear up the problem.

Ronn — Aug 07, 2012 08:40 pm

Change "content_encoded" (item.content_encoded.match) in line 52 of rsslogger.rb to "description" (item.description.match), as directed.

Getting closer..

When I try and import the Instapaper RSS, I can get one link in and see the following in Terminal:

Error expanding <http://mattgemmell.com/2012...>

Can't get anything when using the Pinboard RSS. Get the following in Terminal:

```
/Users/ronn/Documents/Slogger/lib/rsslogger.rb:49:in log_rss': undefined method pubDate' for #  
(NoMethodError)  
from /Users/ronn/Documents/Slogger/lib/rsslogger.rb:48:in each '  
from /Users/ronn/Documents/Slogger/lib/rsslogger.rb:48:in log_rss '  
from /Users/ronn/Documents/Slogger/lib/rsslogger.rb:41:in each '  
from /Users/ronn/Documents/Slogger/lib/rsslogger.rb:41:in log_rss '  
from slogger:52
```

When I run the two RSS feeds together, I get these combined:

```
Error expanding http://mattgemmell.com/2012...  
/Users/ronn/Documents/Slogger/lib/rsslogger.rb:49:in log_rss': undefined method pubDate' for #  
(NoMethodError)  
from /Users/ronn/Documents/Slogger/lib/rsslogger.rb:48:in each '  
from /Users/ronn/Documents/Slogger/lib/rsslogger.rb:48:in log_rss '  
from /Users/ronn/Documents/Slogger/lib/rsslogger.rb:41:in each '  
from /Users/ronn/Documents/Slogger/lib/rsslogger.rb:41:in log_rss '  
from slogger:52
```

Okay..

Here is my fix for this for now..

I took the Instapaper and Pinboard feeds and ran them through Tweetfeed and then to a Twitter account that I set up so that I could send my RunKeeper stats to it (as RunKeeper doesn't have a way to RSS your stats). To each of the feeds, I added the suffix, Instapaper or Pinboard, respectively, so that I could have that as a search term.
