The image script tries to run `/usr/local/bin/convert`, but there is nothing. Which tool need to be installed?

Brett — Aug 08, 2012 05:43 pm

ImageMagick, available through homebrew and elsewhere. It should just move on if it doesn't see that `convert` is available, but I might have to go back and peek at the code.

Florian — Aug 08, 2012 05:54 pm

Ahh, brew `install imagemagick` does the trick :) Now everything works, this is really really nice! Thanks for your work
