Another issue with Slogger. On your blog entry introducing Slogger, you show this in your config if you have multiple RSS feeds:

```
rss_feeds: [ http://feeds.feedburner.com/BrettTerpstra
             http://www.tuaw.com/editor/brett-terpstra/rss.xml ]
```

So I did this in my config:

```
rss_feeds: [ http://www.chainsawonatireswing.com/feed/
             http://blog.granneman.com/feed/ ]
```

I know both feeds work. However, when I run Slogger, I get this:

```
$ ruby slogger
/System/Library/Frameworks/Ruby.framework/Versions/1.8/usr/lib/ruby/1.8/yaml.rb:133:in `load': syntax
error on line 8, col 35: `             http://blog.granneman.com/feed/ ]' (ArgumentError)
    from /System/Library/Frameworks/Ruby.framework/Versions/1.8/usr/lib/ruby/1.8/yaml.rb:133:in `load'
    from /Users/rsgranne/bin/Slogger/lib/configtools.rb:9:in `load_config'
    from /Users/rsgranne/bin/Slogger/lib/configtools.rb:9:in `open'
    from /Users/rsgranne/bin/Slogger/lib/configtools.rb:9:in `load_config'
    from slogger:28
```

I'm not sure why it fails.

## **Ronn — Aug 09, 2012 11:40 pm**

Looks like you need a comma (,) after the first feed.

## **Scott Granneman — Aug 09, 2012 11:50 pm**

Well, yes, except that Brett's example does NOT have a comma after the first feed.

## **observer — Aug 09, 2012 11:58 pm**

Yes it does

## **Scott Granneman — Aug 10, 2012 01:33 am**

Then I must be blind. When I look at Brett's sample config above, there is no comma after the first feed.

## **Brett — Aug 10, 2012 02:01 am**

I swear this image is unedited.

```

```

## **Ronn — Aug 10, 2012 01:58 am**

@Scott - The example in your comment certainly does not have a comma in it, but the example in the original post does.

You might just try it with the comma in there and see if it doesn't work. :-)

## **Scott Granneman — Aug 13, 2012 01:37 am**

I eventually used the comma, & yes it worked. But I *swear* that when I look at the page in Chrome, there's no comma. See?

That's a screenshot from my MBP of the config in Chrome. When I look at the same page in other browsers, I see the flippin' comma! Weird!

**Scott Granneman — Aug 13, 2012 01:40 am**

Dang it - the screenshot didn't show up ... & I used Markdown. OK, here's a link:  
<http://ftp.granneman.com/sl...>

I'm really not an idiot. I write books 'n teach 'n stuff!

**Brett — Aug 13, 2012 01:46 am**

Just so we're both sure we're not crazy, it looks like there's some syntax highlighting in your screenshot. Is that from a plugin or something on my site? I'm wondering if a syntax highlighter might have obscured the comma somehow...
