@Scott - The example in your comment certainly does not have a comma in it, but the example in the original post does.

You might just try it with the comma in there and see if it doesn't work. :-)

Scott Granneman — Aug 13, 2012 01:37 am

I eventually used the comma, & yes it worked. But I *swear* that when I look at the page in Chrome, there's no comma. See?

That's a screenshot from my MBP of the config in Chrome. When I look at the same page in other browsers, I see the flippin' comma! Weird!

Scott Granneman — Aug 13, 2012 01:40 am

Dang it - the screenshot didn't show up ... & I used Markdown. OK, here's a link:
<http://ftp.granneman.com/sl...>

I'm really not an idiot. I write books 'n teach 'n stuff!

Brett — Aug 13, 2012 01:46 am

Just so we're both sure we're not crazy, it looks like there's some syntax highlighting in your screenshot. Is that from a plugin or something on my site? I'm wondering if a syntax highlighter might have obscured the comma somehow...
