Brett - Loved your podcast interview with the Day One folks, and thanks for this great script. I am having trouble with the [Last.fm](#) functionality. The script only pulls the most recent 10 items from my [Last.fm](#) played tracks listing (basically the same tracks that appear in the "Recently Listened Tracks" section of my [Last.fm](#) user page at last.fm/user/username ("last.fm/user/username")){rel="nofollow" target="_blank"}. It does not pull all the listened to tracks for the day, which for me numbers in the dozens. Is this the intended functionality, or should it be pulling all the tracks?

Thanks,
Drew
