I am having issues on Sierra

“[nvALT.app](#)” can’t be opened because the identity of the developer cannot be confirmed.

Your security preferences allow installation of only apps from the App Store and identified developers.

Google [Chrome.app](#) downloaded this file today at 12:46 PM from assets.brettterpstra.com.

ttscoff — Sep 29, 2016 07:32 pm

I am not sure why this is happening, both the app and the dmg are codesigned. You're not alone, though. The solution is to right click on the app in Finder and choose open. That will bypass it and it shouldn't come up again.

michaelpporter — Sep 29, 2016 07:57 pm

Thank you, that did it.
