Just a minor question, is it not possible to enable "2.2 take 1" or "take 2" to update via the "Check for Updates..." menu?

I tried checking for updates from one of either "take 1" or "take 2" and I was told that I had the latest version and wouldn't update to "take 2.2."

Obviously, I was able to download the latest manually. However, I just thought it would be simpler for "the masses" if Check for Updates was working in this scenario.

Thanks for all of your efforts with nvALT. Just made my first donation, and look forward to checking out BitWriter!
