You mentioned using tags in MindMeister and filtering based on them. Do you use the 'Note' field for this or are you relying on an included tag system I just missed when working with MindMeister?

ttscoff — Sep 22, 2014 01:55 pm

Oops, that was an error. It's Mindjet MindManager that allows extensive tagging. It's pretty awesome for big maps that you want to easily filter, but not enough on its own to make me switch back. Maybe I can talk Toketaware into adding similar to iThoughts someday...
